

Trellex Wear Components: Innovative components designed to wear out before your equipment does.

NC Industrial's Trellex wear liners are manufactured for a variety of wear applications from 40-70 durometer rubber and include hot vulcanized aluminum fixing profiles.

- Provides excellent wear protection for feeders, transfer points, chutes etc.
- Vulcanized aluminum profiles with T-Bolts allow for easy adjustment
- Outstanding wear resistance in applications with both sliding wear and impact
- Reduces noise and vibrations
- NCI's wear liners can be custom manufactured with durometers between 40-70
