

# Babbitt Service

At NCIndustrial, we are the best option for remanufacturing Babbitt bearings.

At NCI our approach to lining Babbitt bearings combines years of experience with the latest in sealing technology allowing us to preform contaminate free Babbitt pours every time. As with all NCIndustrial projects, you can expect the highest level of quality and precision. We only use new stock and every Babbitt bearing is poured with the right alloy for the application. We also supply with a metallurgical analysis of the Babbitt alloy and a sample puck of Babbitt poured from the same charge as your bearings. Both the sample and the Babbitt bearing are guaranteed to match every time.
